

HARDEV KAMBOE

Bachelor of Design (UI/UX) 3rd Year Student

PROFILE

I'm a third-year UI/UX student on a mission to make technology as user-friendly as possible. I get a kick out of deciphering what makes users tick and turning those insights into designs that not only look good but also feel like a breeze to use. Juggling courses have given me solid design groundwork and a knack for playing around with various tools, but it's the collaborative projects that have taught me the real value of teamwork and empathy in crafting designs. I'm all about soaking up new trends and techniques, eager to keep growing and crafting digital experiences that leave users smiling.
